Renaissance Spa Baths

The focal point of a well conceived bathroom is always the bath.

The Renaissance has added a factory fitted airspa system to a selected range of popular bath designs. The benefits of this system, combined with the wide range of baths available enable you to discover just how luxurious your bathroom could be.

Air is delivered through strategically positioned micro holes in the base of the bath so that there are no protruding jets in the base.

This allows for a comfortable and vingarating experience and is backed up by automatic dry out facility on all models.

All the Spa baths come complete with Armour Plus reinforcement as standard and a Premier reinforced bath panel has been developed for the rectangular, bath range.

Only your eye is good enough.
We hope you will find what you like
and like what you find.

MANUFACTURERS OF QUALITY ACRYLIC BATHS, AIRSPA'S,
SHOWER TRAYS & EASY ACCESS BATHS

Air Spa Features

Electronic Control Touch Pads

no light 2 button

with light 3 button

Wave Motion

To activate hold down the variable speed function button for a few seconds, this then automatically sets the blower into this function.

Auto Dry Out Facility

After switching off the system and the water has passed below the water level sensor the system will restart automatically after twenty minutes and switch itself back off after approximately sixty seconds.

Hole Configuration

This shot shows the strategically placed holes positioned in the base of the bath. The size of the bath determines the number and configuration of the holes. (This may alter from images in the brochure).

Light (optional extra)

The light has fixed colours and a therapeutic auto colour change sequences.

Light colour options (optional extra)

This innovative LED light system creates the desired mood with numerous solid colour options and five colour sequence settings to provide a relaxing bathing experience. This is achieved in sequence order (as numbered below) by pressing the light button symbol.

Armour Plus

Four great reasons

Armour Plus is a special process which has been developed to create a very rigid, super-strong acrylic bath.

Renaissance has produced the modern equivalent of the old cast iron bath but with a better surface and a warmer touch. How do we do this?

LAYERONE : Outer surface. High gloss acrylic. Solid colour won't fade or rub off.

LAYER TWO : Glass reinforced Polyester provides strength & high impact resistance.

LAYER THREE : Special mix of Polyester resin & glass fibre increases torsional rigidity.

LAYER FOUR : "Blue" mix of Polyester resins seal the shell & completes the lamination.

Whereas most acrylic baths are constructed in two layers, Renaissance Armour Plus baths have four layers. Each one is designed to provide extra strength exactly where it is needed. This requires manufacturing to a high degree of accuracy such as that which is provided in the motor industry by robots. So we decided to use robotics to do this exacting job for us.
